FB-VER-F-M-MA/VA

Item 116150

ingun[®]

Partner for Future Technology

- Secure hold of the test fixture on the base plate of the Pylon receiver
- Protection against lifting of the front of the test fixture during locking
- The receiver must be equipped with the receiver fixing mechanism.

Application

The functional unit is used to securely fix the test fixture to the base plate of the Pylon receiver and serves as protection against the front of the test fixture lifting while locked.
