

- Deflection-resistant design made of FR4
- Low thickness tolerances
- Standard thickness of 10 mm

### General data

|                   |                                  |
|-------------------|----------------------------------|
| Product group:    | Probe plates                     |
| Series:           | KTP ATMAxx/HF                    |
| Type:             | Radio-frequency exchangeable kit |
| Version:          | ESD                              |
| Accessory type:   | Customising accessories          |
| Material:         | FR4, ESD-coated                  |
| Width:            | 275 mm [10.8 in]                 |
| Height:           | 10 mm [.393 in]                  |
| Weight:           | 0.98 kg [2.16 lbs]               |
| Min. temperature: | 10 °C [50 °F]                    |
| Max. temperature: | 60 °C [140 °F]                   |
| RoHS-compliant:   | Yes                              |

### Compatible with

|                                |                          |
|--------------------------------|--------------------------|
| Exchangeable kits version:     | HF, ESD                  |
| MA exchangeable kits (ATS MA): | ATS MA12(/S-7)/HF/AL/ESD |

### Technical data

|                           |                                           |
|---------------------------|-------------------------------------------|
| Length:                   | 203 mm [7.99 in]                          |
| Outer dimensionS (WxDxH): | 275 x 203 x 10 mm [10.8 x 7.99 x .393 in] |
