

DW-X-S Handy screw-in tool Reliable testing by optimally screwed-in test probes

To ensure the optimal screw-in torque at screwed test probes the new torque key series **DW-X-S** was designed. The ratchet at the handle of the key ensures the recommended moment reliably and repeatedly accurate.

Due to the small dimensions the DW-X-S is very handy and can be used also in smallest spacing conditions.

According to the moment the DW-X-S have different colours. The bit tools are fixed with a magnet and are assigned to the DW-X-S and can not be interchanged.

This series is available as of now and replaces the former series DW-X.

DW-1-S

DW-3-S

DW-5-S

DW-S (Handle without ratchet)

Technical Information

Torque key	Test Probes		
DW-1-S 1 cNm	GKS-050 M	GKS-075 M	GKS-087 M
DW-3-S 3 cNm	GKS-899 M	PKS-171 M	T899 M
DW-5-S 5 cNm	GKS-112 M GKS-112 MD GKS-204 M GKS-212 M GKS-427 M GKS-746 M	GKS-761 M GKS-913 M GKS-967 M HSS-118 M HSS-520 M HSS-827 M	SKS-215 M/MF SKS-465 MF SKS-465 SF T-112 M T-912 M VF-3
DW-S Handle without ratchet	All (no torque limiting)		

Example:
 DW-1-S with BIT-GKS-075 M-B

Ordering Example

Torque keys pre-set: D W - 1 - S D W - 3 - S D W - 5 - S

Handle without ratchet: D W - S
