Partner for Future Technology

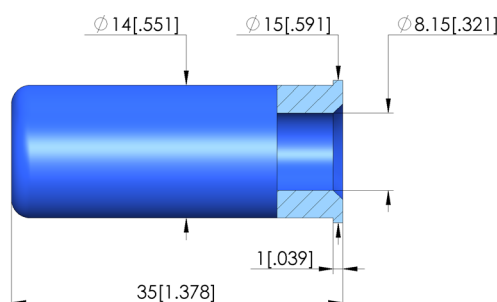

- High-precision guide bush
- Precise, low-friction contacting
- Centring accuracy of +/- 0.075 mm in combination with guide pins #2229 #2230
- Quick, easy installation

Application

Guide bushes are used in combination with compatible guide pins for precise and low-friction contacting. This primarily serves to minimise the lateral and torsional forces acting on the stroke movement and to ensure reliable, accurate contact.
