1. Product group specification and material assignment

This technical data sheet applies to the following types of packaging. Item numbers and material specifications can be found in the overview in Annex I.

Type of packaging:	Grouped Packaging (Secondary Packaging)
Role INGUN under the PPWR:	Manufacturer & Producer
Item numbers:	See the overview in Annex I
Material specifications:	See the overview in Annex I

2. Regulatory material approvals

Based on current knowledge, there is no evidence that the packaging listed below, including any added color masterbatches, fails to meet the following requirements of Regulation (EU) 2025/40 (PPWR).

Article 5 (1) PPWR Minimisation of hazardous substances	The material is designed to minimize the presence and concentration of substances of concern.
Article 5 (4) PPWR Heavy metals	The total concentration of lead, cadmium, mercury, and hexavalent chromium in the packaging material does not exceed 100 mg/kg.
Article 5 (5) PPWR PFAS	The requirements for compliance with PFAS limits apply only to packaging that comes into contact with food as intended.

3. Recyclability and Minimum Recycled Content

A final assessment of recyclability and, where applicable, the minimum recycled content will be carried out on the basis of the applicable PPWR requirements and the supplementary legal acts adopted in this regard. The respective information will be updated in accordance with the applicable regulatory status.

Article 6 PPWR Recyclability	The binding requirements for recyclability apply from the dates specified in Article 6 of the PPWR (from 2030). The design-for-recycling criteria and the methodology for assessing recyclability will be further specified by supplementary legal acts of the European Commission.
Article 7 PPWR Minimum recycled content	Article 7 of the PPWR specifies minimum recycled content requirements for the plastic content of certain packaging. The requirements apply from the dates specified in Article 7 (from 2030) and vary depending on the type of packaging and its intended use.

4. Traceability

The packaging is identified by means of a unique part number or another suitable identification mark in conjunction with the customary delivery documents.
